Number of days required by the Job: **Multiple**

Special Requirements: **Downtown location, special over spray consideration**

Foam and coatings used: **BAY SYSTEMS**

Project Description: An old concrete and steel framed building was purchased and renovated into a major local architect's main office. The building is located in a section of town being revitalized using green building techniques.

Benefits of using Foam: 7-8 inches of foam provided a superior insulated building envelope. The building is designated LEED platinum and features wall insulation, a photovoltaic area utilizing foam and TPO roofing, a foam and coated roof area and white oak siding area, all installed by henderson johnson
