

Porta John Retrofit

Installer: **Standard Insulating Co.**

Location: **Marcy, NY**

Type of Job: **Air-seal, insulate, and waterproof hunting stand**

Square Footage of Job: **160 sq ft**

Equipment Used: **Graco E-20**

Number of people needed for the Job: **1**

Number of days required by the Job: **2**

Special Requirements: **Needed to be light, waterproof, camouflaged, and have a thermal barrier.**

Foam and coatings used: **NCFI Insulstar ? Aldo 357 coating / Flame Seal TD**

Project Description: The customer's 96 year old grandfather had always enjoyed deer hunting, but could no longer physically handle the elements. Using a porta-john, we installed thermal barrier coating to the exterior, 2 inches of closed cell spray foam/coating, then painted with camouflage to provide a dry insulated, and portable hunting stand.

Benefits of using Foam: By creating a rough exterior surface with closed cell spray foam that was painted in camouflage we were able to provide a waterproof hunting stand that blended well to its surroundings. Totally waterproof and well insulated, the grandfather could hunt in comfort virtually using body heat to stay warm.
