FOR IMMEDIATE RELEASE

Flame Control Names President and Hires Marketing Manager

Niagara Falls, NY. September 28, 2011 — Flame Control Coatings has announced that Tim Miller has been appointed President. Prior to this position, Miller was working as Flame Control’s Chief Operating Officer. He will be responsible for the Company’s strategic growth and direction.

Miller brings over 20 years of Sales/Marketing experience to Flame Control. Prior to joining Flame Control a year ago as COO, he worked as Senior VP of Sales at Masco Retail Cabinet group. He received his Bachelor’s in Economics with an International Finance concentration from the University at Buffalo.

Flame Control also hired Ryan Najmulski as Marketing Manager. Najmulski will be responsible for developing and overseeing marketing/advertising/promotion activities in addition to evaluating customer research, market conditions, and competitor information.

Flame Control Coatings manufactures and sells fire retardant, high temperature (heat resistant), and other specialty coatings that are used in a variety of applications. The fire retardant product line meets building fire codes and many are UL-certified. These coatings are used in schools, restaurants, penal institutions, and other buildings where a fire retardant coating is required. High Temperature paint is applied to plant equipment like boilers, pipelines, heat exchangers, and other surfaces that have temperatures ranging from 200°F-1500°F. These coatings are used by OEM, food processing plants, refineries, and other industrial locations.

Flame Control has been in business for over 30 years and operates in Niagara Falls, NY.
