SPFA Publishes New TechDoc SPFA-150 for Photovoltaic Systems and SPF Roofing Systems

Fairfax, VA (May 11, 2017) - A task group within the SPFA Roofing Committee has completed the development of a new SPFA TechDoc for installation of SPF Roofing with roof-mounted photovoltaic (PV) systems. This new document provides an introduction to PV technology, design considerations, service and maintenance, warranty questions, applicable codes and standards, and an overview of mounting options. The self-flashing properties of SPF roofing systems, along with superior energy savings, make SPF an excellent choice as a roofing system for any type of roof-mounted PC system. Free copies of this new TechDoc are available here.

About Spray Polyurethane Foam Alliance (SPFA)

Founded in 1987, the [Spray Polyurethane Foam Alliance \(SPFA\)](http://www.sprayfoam.org) is the voice, and educational and technical resource, for the spray polyurethane foam industry. The Alliance is a 501(c)6 trade association composed of contractors, manufacturers, and distributors of polyurethane foam, related equipment, and protective coatings, inspections, surface preparations, and other services. The organization supports the best practices and the growth of the industry through a number of core initiatives, which include educational programs and events, the SPFA Professional Certification Program, technical literature and guidelines, legislative advocacy, research and networking opportunities.
