SPFA PCP MASTER INSTALLER FIELD EXAM

Candidate Name:	Date:
Company Name:	
Address:	
Orientation Completed By:	
Please answer: Yes (Y) or No (N) to the following questions during the field examination:	

1. Documentation and PPE (20% weighting)

Scope: Demonstration of personal protection equipment (PPE), documentation and their role in personal health and safety.

Did the candidate do the following:		Yes	No	N/A
1	Show a project safety checklist for a project?			
2	Show a pre-construction meeting form that has been filled out?			
3	Show a Job Fact Sheet?			
4	Show the project daily log that has the following items filled out: date work completed, weather conditions, materials used, amount of work completed & batch numbers?			
5	Show Quality Control procedures/log?			
6	Demonstrate completing a roof sketch that shows the areas of work completed for the day?			
7	Show the SDS sheets for each material being installed?			
8	Explain what type of information is in each section of the SDS sheets?			
9	Show the filter change out schedule/log?			
10	Show where emergency numbers are posted?			
11	Show the temperature range that is recommended for the product?			
12	Demonstrate a tool box talk/safety briefing?			
13	Select the proper respiratory PPE?			
14	Select the proper eye PPE?			
15	Select the proper hand PPE?			
16	Select the proper protective clothing PPE?			
17	Select the proper footwear PPE?			
18	Select the proper PPE that should be used for the specific coating being installed?

NOTE: Shaded areas are the same on both Insulation & Roofing Field Exams

2. Pre-Application (20% weighting)

Scope: Demonstration of the ability to verify substrate conditions are acceptable and that safety procedures and equipment are being utilized.

Did the candidate do the following:		Yes	No	N/A
1	Select and show where the proper safety and warning signs are located at the jobsite?			
2	Show that all heat producing devices and ventilation systems are disabled, sealed and protected from exposure to SPF and from accidental powering on during spray and ventilation periods?			
3	Show the location of power sources and equipment that should be locked and tagged out?			
4	Demonstrate the proper lockout and tag out procedure?			
5	Show locations of fire extinguishers, confirm inspection date is current, correct type and quantity?			
6	Demonstrate how to properly set up both an extension and a step ladder?			
7	Show areas on the project where fall protection will be required and demonstrate safe setup?			
8	Demonstrate how to check the substrate temperature prior to application of spray polyurethane foam and indicate the proper temperature range?			
9	Demonstrate how to check the moisture level on/in the substrate and indicate whether the surface is dry enough to apply foam?			
10	Demonstrate that the substrate is properly prepared and is clean, dry and free of dust, loose scale or rust, oil or ice?			
11	Demonstrate proper masking procedures in the mock up area?

NOTE: Shaded areas are the same on both Insulation & Roofing Field Exams

3. Equipment/Rig (10% weighting)

Scope: Demonstration how to service equipment and identify various procedures and processes in rig in accordance with manufacturer's guidelines.

Did the candidate do the following:		Yes	No	N/A
1	Show the HMIS label on the container for the foam that will be used and explain what the instructions mean?			
2	Show the lot number and expiration dates?			
3	Show the location of the eye wash?			
4	Inspect and check equipment and tools for operation or damage and indicate whether tool is safe or unsafe for use?			
5	Explain to examiner the procedure to ensure a continuous supply of material to the machine, and indicate the techniques used?			
6	Demonstrate how to rebuild the plural component spray gun?			

Field Examiner Signature: _____ Start time: _____ End time: _____

NOTE: Shaded areas are the same on both Insulation & Roofing Field Exams

4. Application (35% weighting)

Scope: Prep area for PPE which is required at Station 4 Demonstration of application of spray polyurethane foam to specific thickness with proper pattern/distance and mix.

Did the candidate do the following:		Yes	No	N/A
1	Demonstrate how to spray a test pattern and describe how the test is used to verify proper mix and pattern?			
2	Demonstrate spraying with the gun at the proper distance from substrate?			
3	Demonstrate the proper application of foam to the parapet wall?			
4	Demonstrate the proper application of foam at the pipe penetration?			
5	Demonstrate the proper application of foam around the drain?			
6	Demonstrate how to apply foam in a uniform manner and to a specified thickness plus/minus 1/4" over the mock up roof area?			
7	Demonstrate how to use a probe to check depth and measure surface uniformity, and explain how to seal the resulting hole? (Candidate shall notify examiner when the application is complete and ready to be checked by examiner).			
8	Demonstrate the ability to spray a pass no more than 1 1/2" or less than 1/2" in thickness?			
9	Demonstrate how to ensure adhesion of foam to substrate? (Note: Core tool is available for candidate use).			
10	Demonstrate they can spray coatings in straight lines and overlap in proper spray pattern?			
11	Demonstrate the ability to spray coating at a specified mil thickness over a given area?			

Field Examiner Signature: _____ Start time: _____ End time: _____

NOTE: Shaded areas are the same on both Insulation & Roofing Field Exams

5. Start-up/Shutdown, Testing, Repair (15% weighting)

Scope: Demonstration of proper way to start-up, adjust, shut-down, test equipment and blister repair procedures.

Did the candidate do the following:		Yes	No	N/A
1	Demonstrate proper equipment start up procedures for the generator, compressor, air dryer, transfer pumps, proportioner, hoses and gun?			
2	Demonstrate procedures for adjusting heat and pressure on the spray machine?			
3	Show how to troubleshoot a pressure imbalance on the spray machine?			
4	Show how to use equipment error codes to troubleshoot problems on the machine?			
5	Demonstrate proper procedure for shut down to park the equipment?			
6	Demonstrate proper procedure for shut down of the heaters A-B and hose?			
7	Demonstrate proper procedure for shut down of the air compressor?			
8	Demonstrate proper procedure for shut down of the main power?			
9	Demonstrate proper procedure for end of job shut down procedures?			
10	Demonstrate how to take and repair a core sample?			
11	Demonstrate how to take and repair a slit sample?			
12	Demonstrate they know how to use an optical comparator to read dry film thickness?			
13	Demonstrate how to repair a blister that is less than 4 inches?			
14	Explain the procedure for repairing a blister that is more than 4 inches?			
15	Show how to change the tip in a coating sprayer?			
16	Demonstrate how to clean the coating sprayer after use?
